Objections must be received by the Company within 60 days after statement of account is rendered, or the charges shall be deemed correct and binding upon the Customer. A bill will not be deemed correct and binding upon the customer if the Company has records on the basis of which an objection may be considered, or if the customer has in his or her possession such Company records. If an entity other than the Company imposes charges on the Company, in addition to its own internal costs, in connection with a service for which a Company Non-Recurring Charge is specific, those charges may be passed on to the Customer.

2.5.1.1 Taxes

The customer is responsible for the payment of any sales, use, gross receipts, excise, access or other local, state and federal taxes, charges or surcharges (however designated) excluding taxes on the Company's net income, imposed on or based upon the provision, sale or use of Local Services. 2.5.2.3 For new customers or existing customers whose service is disconnected, the charge for the fraction of the month in which service was furnished will be calculated on a pro rated basis. For this purpose every month is considered to have 30 days.

2.5.2.4 Amounts not paid within 30 days after the date of invoice will be considered past due. If the Company becomes concerned at any time about the ability of a Customer to pay its bills, the Company may require that the Customer pay its bills within 8 mailing days after written notice or 5 days after personal delivery thereof and to make such payments in cash or the equivalent of cash.

2.5.2.5 A check return charge will be assessed for checks with insufficient funds or non-existing accounts.

2.6.1 Credit for Interruptions

When the use of service or facilities furnished by the Company is interrupted due to any cause other than the negligence or willful act of the Customer, or the operation or failure of the facilities or equipment provided by the Customer, a pro rata adjustment of the monthly Recurring Charges subject to interruption will be allowed for the service and facilities rendered useless and inoperative by reason of the interruption, whenever said interruption continues for a period of 24 hours or more from the time the interruption is reported to or known to exist by the Company, except as otherwise specified in the Company's tariffs. If the Customer reports a service, facility or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

For calculating credit allowances, every month is considered to have 30 days. A credit allowance is applied on pro-rata basis against the rates specified hereunder for Local Line or Local Trunk Service and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit. Credit allowances for service outages that exceed 24 hours in duration will be rounded up at the next whole 24 hours.

3.1.8 Optional Calling Features

The features in this section are made available to Residential and Business Customers on a per use basis. All features are provided subject to availability. Customers may utilize each feature by dialing the appropriate access code. The Customer will be billed per feature activation charge shown in the table below each time a feature is used by the Customer. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all some uses in some cases.

A. Feature Descriptions

Three Way Calling/Call Hold - The Three Way Calling feature allows a customer to add a third party to an existing two-way call and form a 3-way call. The call must have been originated from outside the station group and terminate to a station within the station group. The Call Hold feature allows a customer to put any in-progress call on hold by flashing the switch hook and dialing a code. This frees the line to allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.

Call Forwarding - Call Forwarding, when activated, redirects attempted terminating calls to another customer-specific line. The customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. Call originating ability is not affected by Call Forwarding.

The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the customer with the Call Forwarding is billed for the forwarded leg of the call.

Call Forwarding - Busy automatically reroutes an incoming call to a customer predesignated number when the called number is busy.

Call Forwarding - Don't Answer automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within the number of rings programmed by the Company.

Call Forwarding - Variable allows the customer to choose to reroute incoming calls to another specified telephone number. The customer must activate and deactivate this feature.

3.1.8 Optional Calling Features, (Cont'd.)

A. Feature Descriptions, (cont'd.)

Call Waiting/Cancel Call Waiting - Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

Distinctive Ringing - This feature enables a user to determine the source of an incoming call from a distinctive ring. The user is provided with up to two additional telephone numbers.

Regular Multiline Hunting - This feature is a line hunting arrangement that provides sequential search of available numbers within a Multiline group.

Speed Calling - This feature allows a user to dial selected numbers using one or two digits. Up to eight numbers (single digit, or thirty numbers with two digits) can be selected.

Caller ID - The Caller ID feature allows a customer to see a caller's name and number previewed on a display screen before the call is answered allowing a customer to prioritize and or screen incoming calls. Call ID records the name, number, date and time of each incoming call -including calls that aren't answered by the customer. Call ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the customer to provide the necessary CPE.

SECTION 3 - SERVICE DESCRIPTIONS, (CONT'D.)

3.1 Local Exchange Service, (Cont'd.)

3.1.8 Optional Calling Features, (Cont'd.)

A. Feature Descriptions, (cont'd.)

Automatic Redial - The Automatic Redial feature allows a customer to automatically redial the last number dialed. This is accomplished by the customer activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then redials the call for the customer.

The Automatic Redial feature also allows customers, having reached a busy number, to dial a code before hanging up. Automatic Redial feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically redialed and the customer is notified of the connected call via a distinctive ring.

The following types of calls cannot be Automatically Redialed:

- * Calls to 800 Service numbers
- * Calls to 900 Service numbers
- * Calls preceded by an interexchange carrier access code
- * International Direct Distance Dialed calls
- * Calls to Directory Assistance
- * Calls to 911

Automatic Recall - The Automatic Recall stores the number of the most recent incoming call (including unanswered incoming calls) to a customer's number. This allows a customer to dial back any missed or unanswered telephone calls.

Customer Originated Trace - Customer Originated Trace allows customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the customer can use this application to combat nuisance calls.

3.1.8 Optional Calling Features, (Cont'd.)

A. Feature Descriptions, (cont'd.)

Automatic Recall - The Automatic Recall stores the number of the most recent incoming call (including unanswered incoming calls) to a customer's number. This allows a customer to dial back any missed or unanswered telephone calls.

Customer Originated Trace - Customer Originated Trace allows customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the customer can use this application to combat nuisance calls.

Anonymous Call Rejection: Permits the end -user to automatically reject incoming calls when the call originates from a telephone number which has blocked delivery of its calling number. When active, calls from private numbers will be routed to a special announcement then terminated. The feature may be turned on or off by the end-user by dialing the appropriate feature control code. Anonymous Call Rejection is offered as a stand alone feature or as an add-on to Caller ID Deluxe.

Star Features: Available with selected services are *60 Call Block, *69 Call Return, *57 Call Trace, *66 Call Repeat, and *61 Call Selector.

SECTION 6 – RESIDENTIAL SERVICE OFFERINGS**6.1 Local Line –Residence**

Local Line -Residence provides the Customer with a single, voice-grade, DTMF communications channel. Each Local Line will include a telephone number, as well as access to the services specified in Section 3.1.

6.1.1 Definition of Terms

6.1.1.1 Residence Service is that service furnished in private homes or apartments, including all parts of the subscriber's domestic establishment, for domestic use and not for substantial occupational use; in the study of a clergyman located in a church, in college fraternity or sorority houses, college dormitories, convents and monasteries for domestic rather than occupational use in residential quarters.

6.1.2 Local Line Residence Service Plans

Local Line -Residence is offered as a flat usage based via three service options. These options are set forth below. In addition to the Monthly Recurring Charges, the Customer will be charged applicable per call rates as set forth in Section 7.

Option 1: Option 1 rates are postalized rates (single rate regardless of mileage associated with intraLATA call). There is a peak and off peak rate (see Section ----for definition of peak and off-peak). Option 1 Toll Rates mirror the customer's local service usage rates. Therefore the customer is billed one rate for both local and toll calls.

Option 2: Option 2 establishes a postalized peak and non-peak rate for all non-local calls.

Option 3: Option 3 establishes a peak and non-peak rate based upon the Customer's dialing pattern. For example, all calls made within a LATA dialing seven (7) digits will have a distinct rate from those calls made within a LATA dialing eleven (11) digits.
